

Smartwatch – B30

User Manual

Before using the smart wristband, please first go through this use manual.

Start to use

Side key

Long press: Startup and Power-off

Click: Return to the main interface, screen on, screen off

Operation description

1. Make sure the wristband has enough power to start up for initial use, otherwise please fully charge it. The wristband will automatically start up after being fully charged. Align the charging port to the charging adaptor to adhere both magnetically, until the wristband screen displays the charging icon (charging for 2-3 hours continuously with a 5V charging adaptor)
2. Start-up: Press and hold the power key for 3s to start up the wristband when it is under power-off state. The wristband will automatically start up when charging.
3. Power-off When the wristband is under power-on state, press and hold the power key, the screen will display the power-off interface, select YES then the wristband will automatically power off; or slide down the main interface, click the Settings icon and enter the Settings interface, click System Settings to enter the corresponding interface and click Power-off, then the wristband will automatically power off (you can also restart and reset the wristband through this interface).

All-touch Mode

The wristband is available for all-touch operations: The clock interface can be shifted upwards, downwards, leftwards and rightwards, and the subpage supports right-slide return.

Download and pairing

1. Search F Fit at a popular application store, and download the F Fit App, or scan the following QR code to download it. (Please attach the QR code diagram)

In order to have better use experience. Please upgrade your APP to the latest version when it is available.

2. Open the APP, select the device that you intend to bind from the App's device list, and complete the pairing operation by following the tips. When pairing, please Make sure that the bluetooth names displayed on your phone and your wristband are identical.

Equipment model

After start-up, slide down to switch to the multi-function interface, click the "Gear" icon to enter the "Settings" interface, then enter the "System", and click "About" to check the equipment model of the wristband, then find the corresponding equipment model in the APP terminal and click it to connect

B30 < wristband model

V3.6 < firmware version number

ABCE < last four digits of MAC

Bluetooth connection

When the bluetooth is not connected, the bluetooth icon is hollow.

When the bluetooth is successfully connected, a bar will be displayed in the bluetooth icon. Upon successfully connection, data will instantly synchronized to the App, and can be viewed at the App terminal, as shown in the lower right corner of the following figure
