

3D EYE SMART MASSAGER – Z-027

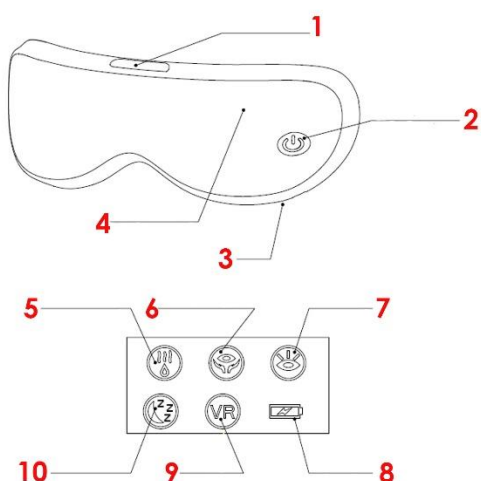

User Manual

Before using this product, please read this manual carefully

Product Features

The eye moisturizing intelligent 3D massager uses multi-frequency vibration and simulates human massage techniques, which can improve the ability of eyes to adjust and improve eye vision. Eye circulation, improve eye soreness and lighten dark circles. 1.EMS: Also known as microcurrent, its main function is to relax muscle spasms and improve eye soreness. 2. Multi-frequency vibration: mechanical vibration is used to improve eye vision and improve eye adjustment ability. 3. Warming: Warm massage promotes absorption, stretches skin texture, accelerates eye circulation, and reduces dark circles. 4. Eye moisturizing spray: Through the high-frequency vibration of ceramics, the eye moisturizing liquid or mineral water is atomized into small water molecules to moisten the eyes and relieve eye fatigue and eye interference.
