Product Details

- ①Touch switch
- ②Type-C charging port
- ③Power digital display
- ④Spraya verysoft coating
- ⑤Wear-resistant replaceable plastic nib
- ⑥Universal Type-C charging cable

Note: The appearance is subject to the actual product.

Product parameter

Length: 165 mm
Diameter: 9.00 mm
Nib: 2.0 mm
Weight: 13.5 g
Charging interface: Type-C USB
Charging specification: 5V/0.2A
Charging time: about 35 min
Smart power saving: Smart shutdown in 5 minutes
Use time: full power can be used for up to 10 hours
Applicable equipment: general mode is suitable for all capacitive screen devices on the market.

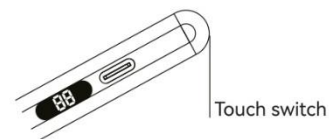

Product Features

1. The product is suitable for most capacitive screen products on the market. The touch head is made of special materials, which can write smoothly, have high sensitivity, wear resistance, and exceed performance.
2. The pen body adopts metal material structure, which fully reflects the texture, avant-garde style, practical and generous, suitable for various groups.
3. This product has strong compatibility, super functions, slim, light and simple design, super fine and super accurate writing experience, it is your best choice.
4. Super wear-resistant, screw tip can be replaced, precise point-controlled writing, writing experience is super Well, there is almost no resistance to writing with the nib, smooth and unobstructed.

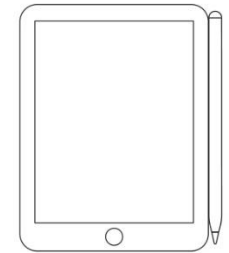

- ①Active recognition technology;
- ②Replaceable pen tip;
- ③Built-in lithium battery;
- ④Intelligent power saving;
- ⑤With magnet adsorption function, it has a long standby time of 1 year and can be used continuously for 10 hours.

How to Use

Turn on: Double-click the touch switch on the top to indicator light turns blue.
Turn off: Double-click the touch switch on the top to indicator light turns off.
