3. Product Features

1). Health Management
(Pedometer, Sedentary reminder, Sleep monitor)

(1-1). Pedometer:

- 1) It can record your walk information for the last 7 days. Make it easy for you to adjust your exercise plan.
- 2) You can set your own height, weight and step length to make the data be more precise.
- 3) It will show your number of steps, distance and calories consumption since you start the pedometer.
- 4) After turning on the "Automatic Counting", your walking information will be recorded automatically every day.

(1-2). Sedentary reminder:

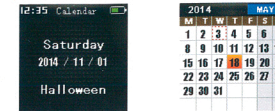

The sedentary reminder can be turned on or off. It is only active from 7:00 to 17:00 regardless of the on or off setting. If you don't walk for a long time, the sedentary reminder will pop up a prompt and play a music to alarm you.

(1-3). Sleep monitor:

You can set the sleep time and waking-up time. Sleep monitor can record the movement you make during sleep and give you a report about your sleep quality.

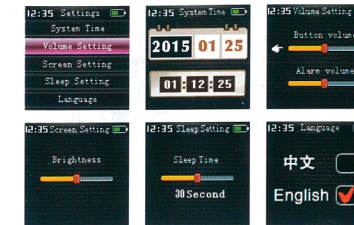

2

2). Calendar

There is a calendar where you can see the date and corresponding festivals. The range of the date is from 1901 to 2099.

3). Settings

Settings include:

- Clock interface, - The system time,
- Volume control, - Screen settings,
- Sleep settings, - Language selection.

3

(3-1). The clock interface:
