# User Manual

### Smart life Together with you

Downloading APP

Pls scan the APP QR Code as above.

Download and install the APP "GoBand", entering the APP, pls agree all the pop-up windows for operation.
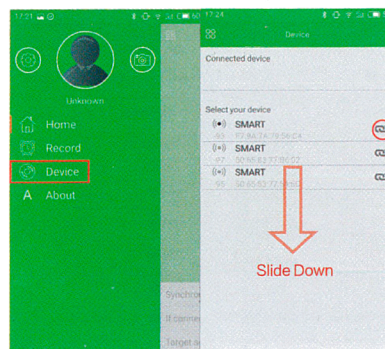

Note: Bracelet should be connected with App.Please never to connect directly by Bluetooth on the phone.

Register an account, and then login to check your sports records anytime, anywhere.After logging in, you can enter home page.Click "Target setting" to set your goals for steps, distance, calories and sleeping.Click the top left corner icon to enter the main menu.
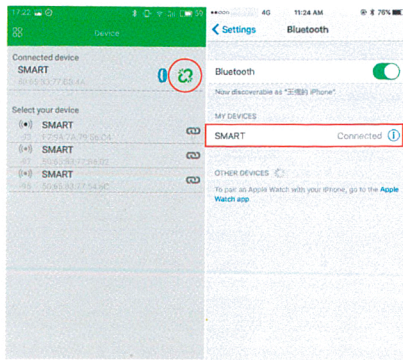

APP Connection

Slide Down

Entering the " Connect Device " in APP, the device will search the smart bracelet automatically, pls put the bracelet close to mobile, shake it slightly, and click " ∞ " , connection successfully.

If the smart bracelet icon here is grey " 0 " ,pls try again, it is failed. If the icon is " 0 " , connection ok. It will need several seconds for APP and smart bracelet to synchronize data. Pls check the time first, if time synchronization failed, the data in bracelet will reset, if successful, the data will be kept,iOS need to agree the pop-up window message(click "pair").as picture
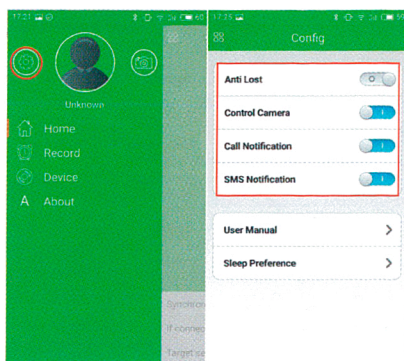

Disconnection

In APP" Connection Device" part, click "🔄" to disconnect APP and bracelet, IOS need go to mobile "Setting" part, and click " ⓘ " to ignore the device.
In order to make sure the other mobile can search the bracelet, we have to disconnect first.
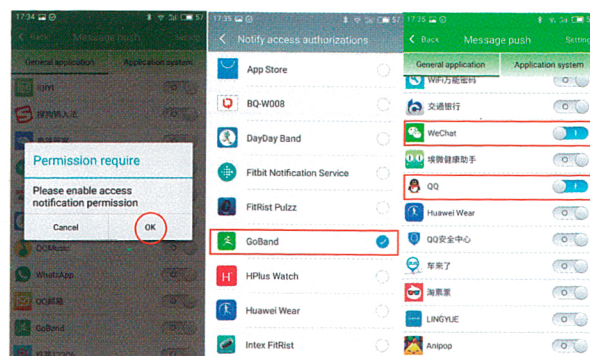

APP Function Setting

Pls click "Setting" part, activate the Anti Lost, Control Camera, Call Notification/ SMS Notification.(IOS above 9.0 has defaulted.)

3

The column charts will show the records of sports data after exercising. The sleeping quality can be checked .
