5. The Bluetooth icon on the status bar of the smartwatch will displayed as gradient. Now the smartwatch and the phone can be searchable with each other (When using the "Search My Device" on the smartwatch, the phone will vibrate and ringing; When using the "Search My Device" on the phone, the smartwatch will vibrate and ringing). The phone and the smartwatch will alarm when they are away from each other over 10 meters

## The Built-in Function on the watch

1. Pedometer: Click into the Option menu on the Pedometer, set personal details, wear the watch and click Start. Swing your arms regularly while walking, and the pedometer will count the steps and calculate the calories burned based on the total step counts.

2. Sedentary Reminder: Click into the Sedentary Reminder menu, and set the sedentary reminder time period after which it will ring and vibrate to alarm you to stand up and walk, as shown in the figure:

3. Sleep Monitoring: Go to the Sleep Monitoring menu, click Start and wear the watch. The user's sleep quality will be monitored based on the vibration degree and sleep time elapsed.

4. Heart Rate: Go to the Heart Rate menu, place the face of the watch on your arm and click Start. The watch will measure the value of your heart rate. (Sensor must be contact with human skin closely. Don't move in the beginning until fist heart rate output, then do motion test.) As shown in the figure:

## Synchronization

### Time Synchronization

If the Synchronous Switch on the watch is turned on by default (Settings - Clock - Time Synchronization), then after success connection with the Bluetooth on the phone, the time and date on the watch will successfully synchronize with the current time and date on the phone and update accordingly.

### SMS

1. If the Reminder on the phone is turned on (Generally in the Settings menu, depending on the different design of the phone with different platform), when the SIM card on the phone receives SMS, the status bar on the phone will display the reminder relating to the SMS and now the watch will also receives the reminder. All the information (except the facial sign) will display normally by clicking view.
2. Click into the SMS menu on the watch to preview all the information in the inbox. You can select any SMS to view, and make quick reply and call to the sender after viewing.

### Dialing

Enter the number on the dialing interface of the watch and the phone respectively to dial, then the watch will immediately synchronize with the phone.

### Call

During the Bluetooth call, the interfaces of the watch and the phone will immediately synchronize with each other. While talking through the watch, you can adjust the volume, display the dial screen, mute and unmute, and end the call, etc.

### Call Record

Click into the call log to view all the call records on the SIM card of your phone. Select and click any number to make Bluetooth call.

### Contacts

Click into the address book to view all the contact number on the phone. Select and click any number to view and make Bluetooth call. (You can choose to synchronize with your phone for instant synchronization)

### Bluetooth Music

Go to the Music menu and click Play to successfully play the music on your phone, thus controlling the music player. Click - to reduce the volume, Click + to increase the volume, Click || to pause or Resume, Click < to play the previous song, Click > to play the next song.

### QQ

If the QQ Message Remider on the phone is turned on (Generally in the Settings menu, depending on the different design of the phone with different platform), when the phone receives QQ messages, they will immediately be synchronized to the watch. You can view the content of these QQ messages in the Notification menu on your watch.

### Webchat

If the Webchat Message Remider on the phone is turned on (Generally in the Settings menu, depending on the different design of the phone with different platform), when the phone receives Webchat messages, they will immediately be synchronized to the watch. You can view the content of these Webchat messages in the Notification menu on your watch.

### Remot Camera (IOS does not support)

When the phone is unlocked, you can click Remote Camera on the watch to preview pictures.

### The Default Email Box, Sina Microblog, Skype, Outlook Mailbox, Pea Pods, etc. on the system of the phone

If the Webchat Message Remider on the phone is turned on (Generally in the Settings menu, depending on the different design of the phone with different platform), when there is a reminder on the status bar of the phone, there will also be a synchronous reminder on the watch. The corresponding interfaces will appear when making calls through Internet.

### My Applications

1. After successfully connecting the watch and the phone, click My Applications in the Bluetooth Notification menu to install the weather and the clock to the watch.

2. After installing the weather, set and save the city (Phone - Bluetooth Notification - My Applications - Weather). You can click into the weather menu on the watch to check the current weather condition in the city.
