Downloading APP

Before connecting, make sure your bracelet is powered on and that your smartphone's Bluetooth connection is on.

After that, you will need to download and install the free "GoBand" application, either by scanning the QR code below, or by downloading it directly from your application store.

Using APP.

Register an account, and then login to be able to check your sports records anytime, anywhere.

After logging in, you will be directed to the home page. Click the top left corner icon to enter the main menu.

Main menu interface

Bracelet Display:

After turning on the bracelet screen, you can scroll through the Time, Date, Step, Distance, Calorie, Camera and Music interfaces, in turn, after each press on the bracelet's main button.

FAQ

- I keep losing Bluetooth connection between the smartphone and the bracelet.
 - Solution: please check the settings of your smartphone, to see if "GoBand" has been authorized and trusted.
- The bracelet can't be found by the smartphone.
 - Solution: turn off the Bluetooth of your smartphone, then turn it on and run the search again.
- There are no incoming call notifications on the bracelet even though my smartphone and bracelet are already synchronized.
 - Solution: for Android versions, in your smartphone settings, allow the "GoBand" to access your incoming calls and messages, and to keep running in the background.
- Is the bracelet waterproof?
 - The bracelet is IPX4 waterproof, which means it is fine to wear it for daily activities, and that it will resist to splashes only. It is thus necessary to remove it while bathing, swimming, entering a sauna or steam room and so on...

Important note: Different smartphone OS and using environments may cause connecting and other issues. Please contact with your dealer to solve any problem your encounter that does not appear in this user manual.

Click "Target setting" in the homepage to set your goals for steps, distance, calories and sleeping.
