## Three. Basic Operation

### 3.1 See the figure

### 3.2 Use of SOS Function

- Setting of SOS Function**  
Open the setting inside the watch—Quick SOS—open distress button—distress short message (the content can be edited)—add the number (the number can be one or multiple, note that the number shall be saved into the contacts first, and then can be added)
- Use of SOS Key**  
Return to the main interface after finishing the setting, long press SOS key, release the finger after the vibrating reminder occurs, the watch will send out SOS short message first, then dial the number, if the multiple number have been added, the SOS short messages and numbers will be sent out and dialed orderly. Short press SOS key as a return key.

## Four. Downloading Installation And Using Instruction of APP

4.1 Please use the cellphone with version Android 4.3 or above to scan the QRC, download and install the position of the QRC for the exclusive APP.

- The QRC will pop out when opening the cellphone in the first time
- The main menu of the watch—setting—cellphone helper open the QRC.

### 4.2. Using help of APP

- How to link?**  
Open the software, click the button 'search equipment' on top-right corner, click the name of the equipment in the list for linking after searching out the equipment, the main page will pop out after linking is successful. (please open the blue tooth during this period)
- Cannot find the reminder of the application?**  
Finish the following operations after confirming linking of the equipment, find the setting of the cellphone>safety>notification for read permission, find out this application to select 'save', or select 'confirm' to enter into the setting in the pop-up window when opening the application in the next time.
- How to send the content?**  
Click 'send content' in the main page that can send the voice documents or pictures to the watch. (based on the transmission of the blue tooth)
- Cannot find the watch?**  
If you cannot find the watch, click 'find the equipment', the watch will ring.
- Reminder of application**  
Click the reminder in the label column to enter into the interface of application, the application can be selected according to the need after finishing uploading.
