1. Cautions

1.1.

The information in this document is subject to change without notice, every effort has been made in the preparation of this document to ensure accuracy of the contents, but all statements, information, and recommendation in this document do not constitute a warranty of any kind, express or implied. It is normal that some functions may vary in certain version of software.

1.2.

Please charge the watch for no less than 2 hours before first use.

1.3.

When under water, please do not press the power button, and the capacitance value of the touch screen will change, so it is normal that the touch screen does not respond to your touch-based gesture.

1.4.

With IP68 water & dust protection, your watch may be used for shallow-water activities like swimming in a pool. However, it should not be used for diving, water skiing or other activities involving high-velocity water or hot bath, submersion in tea or any other corrosive liquid. Diving under more than 3 meters water or pressing the button when under water may cause water coming into your

1

watch, these are destructive use and you will not be able to enjoy the warranty and free maintenance.

2.Get Started

Supported smartphone Operating System: Android OS 5.0 or later, IOS 8.0 or later (requires iPhone 5 or later).

2.1.Charging the watch

> **NOTE:**

Solutions of the problem that the data of pedometer/sleeping/heart rate cannot be synced to Fundo Wear:
1. You phone can only install one Fundo Wear App.
2. Register and log in your Fundo Wear first before using it.
3. Ensure that your watch and your phone have been bi-directional paired successfully.
4. Sleep monitor and Pedometer cannot be working at the same time.

5. If the data still cannot be synced to the Fundo Wear, please restart your watch and your phone, and try the steps above again.

4. Common troubleshooting

In case there is a problem during the using of your watch, please solve it accordingly by the following ways. If the problem persists, please contact the local dealer or the designated service representative.

4.1. Cannot power the watch on

a. Please firmly press the power button for at least 3 seconds.
b. The battery power may be too low to power on, please recharge your watch and start again.

4.2. Auto power off

The battery power is too low, please recharge your watch.

4.3. Short battery life

The battery is not full charged, please ensure an enough time to charge your battery up (No less than 2 hours).

4.4. Cannot be charged normally

a. Check whether the battery still can be used. The performance of battery will degenerate after several years use.
b. Check whether the charger is workable, you can replace a new charger and try again.
c. Check whether the watch charge interfaces and charge cable are normally connected.

4.5. Do not display caller's name

When your watch is paired with your phone, please check whether the contacts on your phone are synced to your watch, if not, release the connection. please allow the contacts synchronization while you are pairing your watch and phone again.

4.6. Bad call quality

a). Our watch may not in the normal Bluetooth range of your phone(about 33 feet or 10 meters), please keep a stable Bluetooth connection to ensure a good call quality.
b). Your phone is in a weak signal, please make calls in areas with good signal.
c). The microphone of your watch may be covered by your wrist, please adjust your wrist posture when making phone call.

4.7. Cannot sync the data to Fundo Wear

a). Check if you have log in your Fundo Wear, if do not, please log in first before use.
b). Check If your watch and phone are bi-directional paired successfully, if so, the Bluetooth icon on your watch will display as half green and half blue.
