

## Packing list

Band Charging equipment Instructions

## Know your band

## Install APK/APP

Use the phone to scan the QR code, download and install support for Android system APK or IOS system APP, And according to the guidelines for the relevant settings.

**Warm tip: The band can be used independently, so if you do not need to message remind and mobile data upload mobile phone function, you do not need to install APP/APK.**

iOS

## Mobile phone connection

Through the phone APP / APK click on the "connection device" search "SPORT" and connect, the connection is successful after the upload data"

### There is an error in elevation

The deviation of the actual shape of the earth from that of the reference ellipsoid ranges from 100m to minus, and there is no unique definite value as it varies with the earth's gravity distribution. As a result, there is always an "error" in the elevation data directly exported by GPS.

### Why is mileage less measured than other devices?

The principle of a satellite with floating stars, even if it is not moving, will increase the number of miles, the current market most watches or equipment exist in this phenomenon. And our watches solve this kind of technical problems, in the motionless situation will not increase, because float star and cause to increase mileage.

### Support running mode to play football or basketball?

Not recommended, because each sport mode software calculation is not the same, the reference content is not the same, recommended that the actual sport and the choice of sport mode consistent.

### Support hot water bathing and scuba diving?

No, because the water temperature is too high and the water depth is too great for the water resistance of the product

### There are too many notifications to close the message

Yes, in the mobile phone APP, "social reminder" can be closed.

## Parameter

Display:	OLED, 128*64
Satellite :	GPS
Heart rate:	Heart rate map, Real-time heart rate, Heart rate alert
Accelerometer /Gyroscope :	3axis, 3D Acceleration, Step analysis, Sedentary remind, Sleep remind
Battery:	230mAh
Waterproof:	IP 68
Support system:	Android 4.3+ , IOS 8+
Port:	Charge
Weight:	34g
Size:	24/42/13mm
Input:	3.7V 1.0A MAX
Execution standard:	LX10628-2018

## Common problem

### Mobile phone connection unsuccessful

- 1, whether the mobile phone connection has been opened;
- 2, whether the phone has been installed APP/APK;
- 3, mobile phone connection is connected to other products;
- 4, watches have been connected to other mobile phones.

### Satellite connection unsuccessful

- 1, remain stationary when searching for a satellite
- 2, please confirm the outdoor environment open;
- 3, please confirm is not in the room;
- 4, please confirm the watch battery power;

Note: Please use it in an outdoor environment. If the surrounding buildings are denser, dense woods and bad weather will affect the satellite signals.

### How long will it take to link up the satellite?

For the first time, /2 hours or more of the satellite is not connected, the search star time is about 2 minutes;

The heat connects the satellite (to stay in place for less than 30 minutes) and the search time is about 20 seconds.

### Battery life is short

- 1, the battery may not be full of electricity, please give the watch full of electricity;
- 2, charging USB charging cable may not be fully inserted into the charger interface led to failure, please confirm whether the watch battery symbol is in charge state;
- 3, please confirm whether the GPS is open for a longer time.

### Heart rate value error

- 1, please confirm whether the tightness of the watchband wearing the right; <sup>GPS</sup>
- 2, please confirm the watch's heart rate lens is close to the skin surface;
- 3, the weather is too cold to affect the heart rate monitoring.

### The heart rate setting is turned on, why is the heart rate light not on?

The heart rate setting switch is the daily monitoring of the heart rate on the home page (monitored every 10 minutes), That is, the heart rate light is lit every 10 minutes. The heart rate monitor under exercise mode is automatically turned on by default, independent of heart rate settings.

### The heart rate alarm is on, why not?

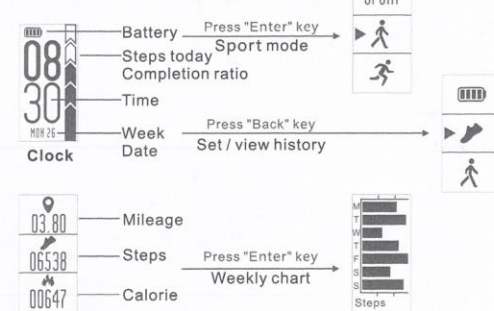

The heart rate alarm function is only supported in motion mode.

### Which model is chosen for indoor running?

In the indoor environment, you can choose not to open GPS walking mode.

## Homepage

Touch "page down" key to switch home page

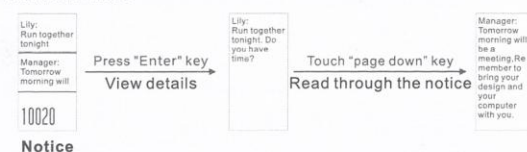

### Daily steps

#### Note:

- 1, please confirm whether the tightness of the watchband wearing the right;
- 2, please confirm the watch's heart rate lens is close to the skin surface;
- 3, the weather is too cold to affect the heart rate monitoring.

## Other reminder icon

## Sport mode

At the clock interface, press "enter" key, enter the sport mode option interface

### Walk (No GPS)

**Start** Open sport mode > Choose to walk mode > Press "enter" key

**View all types of data** Touch "page down" key

**Stop** Press "enter" key to stop > Press "back" key > Choose to continue / save data / delete data

### Run (GPS) outdoor open environment use

**Start** Open sport mode > Choose to run mode > Wait for satellite connection (satellite icon flashing is not connected) > Press "enter" key

**View all types of data** Touch "page down" key

**Stop** Press "enter" key to stop > Press "back" key > Choose to continue / save data / delete data

### Climb (GPS) outdoor open environment use

**Start** Open sport mode > Choose to climb mode > Wait for satellite connection (satellite icon flashing is not connected) > Press "enter" key

**View all types of data** Touch "page down" key

**Stop** Press "enter" key to stop > Press "back" key > Choose to continue / save data / delete data

### Ride (GPS) outdoor open environment use

**Start** Open sport mode > Choose to ride mode > Wait for satellite connection (satellite icon flashing is not connected) > Press "enter" key

**View all types of data** Touch "page down" key

**Stop** Press "enter" key to stop > Press "back" key > Choose to continue / save data / delete data

### Swim (No GPS)

**Start** Open sport mode > Choose to swim mode > Press "enter" key

**View all types of data** Touch "page down" key

**Stop** Press "enter" key to stop > Press "back" key > Choose to continue / save data / delete data

### Sport data processing

Press "enter" key to stop > Press "back" key > Choose to continue / save data / delete data

## Set / view history

At the clock interface, press "back" key, enter the set/view history interface
