Remark

1. The Stopwatch can support longest time counting up to 23 hours 59 minutes and 59.99 seconds; accuracy can be millisecond level within 23 minutes and 59.99 seconds, and second level accurate after that.
2. When the stopwatch reaches the maximum counting figure, it will automatically start counting from zero again.
3. Stopwatch supports background operation: time counting will continue as long as it's not paused or reset.

Real-time sport data

The watch can be used for checking real-time sport data of the wearer for that day:

1. Press S2 button (press 2/3/4 times and corresponding icons will be showing on the bottom of the dial, then you can get relevant sport data.

2. That day: one day 0:00 to 23:59.
3. It is using 24 hour pedometer mode by default. Note: the first 10 steps will not be showing real-time on display because the system is identifying the walking characteristics of the wearer, this is normal phenomenon.

luminous dial

1. The watch uses FSTN LCD full angle display, ultra-low power consumption.
2. Under poor lighting condition, click the S1 button to turn on the luminous dial (which will last for 2 seconds after each click).
3. In order to save power, please avoid using luminous dial under good lighting condition.

Low power reminder

Low power reminder

When the low power icon (battery symbol) appears on the right corner of the dial, please replace a new battery in time or within 15 days, otherwise it may affect the normal use of the watch.

Replace battery

The machine uses a standard button battery, the user can purchase their own, and then open the watch bottom cover to replace.

APP installation for iPhone

1. If you use iPhone, the operating system need to be iOS 7.0 or above version (ie, iPhone 4S or above model), BT 4.0 or above.
2. To use iPhone (or iPad) to scan the QR code below or search "sports+" on the APP Store to download & install the APP.

3. When prompted to install the downloaded APP, make sure "allow this APP to keep running at backstage" and "trust this application" is turned ON.
4. During installation, if BT on Phone is OFF, please follow the instruction and turn ON BT on phone.
5. For the convenience of users, same QR codes are appearing on several areas of this user guide, please choose to scan the correct QR from "Android phone(domestic) QR" or "Android phone (Oversea) QR" for APP installation.

APP installation for Android phone

1. If you use Android phone, the operating system need to be Android 4.3 or above version, BT version need to be 4.0 or above.

2.1 (for China Users) Scan the QRCode (below) or Search "sportplus" from Application treasure to download & install the APP.

2.2 (for Oversea Users) Scan the QRCode (install Google Play before scanning) to download & install the APP.

3. When prompted to install the downloaded APP, make sure "allow this APP to keep running at backstage" and "trust this application" is turned ON.
4. During installation, if BT on Phone is OFF, please follow the instruction and turn ON BT on phone.
5. For the convenience of users, same QR codes are appearing on several areas of this user guide, please choose to scan the correct QR from "Android phone(domestic) QR" or "Android phone (Oversea) QR" for APP installation.

APP User login

User login

1. Download APP and log in directly.
2. For the first time, click on the picture to fill in the user Person information (sex, date of birth, body High, weight).
3. Set the target number of steps and distance in the setup menu Unit (the system defaults to 10,000 steps)

Binding watch and phone

Binding steps

1. Turn on BT function on both phone and watch, and make sure the distance between two devices to be less than 5 meters.
2. Run the APP On phone, then click the icon (gear icon) in the upper left corner of the main interface (to enter the menu bar).
3. click "Equipment management" on the menu bar.
4. When the phone finds "XWatch", click "XWatch" to complete the pairing and binding.

After binding (when phone & watch connected via BT)

1. Sports data on the watch will be uploaded to server timely, also such data can be checked real-time from the phone APP.
2. Mobile phone related information can be instantly reminded on the watch.
3. Time & date synchronization function will be effective.
4. Remote camera function will be effective.
5. Watch and phone will connect automatically when BT turned on.

Unbinding watch and phone

Cancel reminder function

If you just want to temporarily cancel the reminder etc companion function from the watch, instead of unbinding the watch, you only need to turn off the BT on the watch (press & hold S3 button for 3 seconds to turn off BT). Watch and mobile phone will connect automatically when turning on BT again, and all relevant functions can be resumed immediately. (if binding is removed, then next time you need to do binding again before using).

Remove bounding

1. Click icon (gear icon) on the upper left corner of the APP main interface (to enter the menu bar).
2. Click "Equipment management" on the menu bar to "remove the current binding".
3. Note: Unbinding watch and iPhone will require one more step: To cancel the BT connection between watch and iPhone. Take iPhone6 for example, find the XWatch in the device list of "Setting-->BT" and click "ignore this device".

APP operation

Basic instructions

1. After initial installation of the APP, system will introduce the basic operation of the APP immediately.
2. Click (gear icon) on the upper left corner of APP main interface to enter the APP menu bar, click on the icon again to return to the main interface (Note: see the right picture).
3. Click (gear icon) on the upper right corner of APP main interface to share the homepage information to you friends (via WeChat friends, WeChat Moments, Facebook, Twitter).

Menu description

1. Device management: mobile phone and watch binding or remove binding.
2. Reminder: Alarm clock and information reminder, users can choose to turn on or off the reminder of relevant information.
3. Operation manual: APP basic operation.
4. Settings: Target steps: the user sets the amount of movement per day (steps). Distance unit: kilometre, or mile.
5. Other

Circle of friends: User could add other user of the system / the watch as sports friend, also could access "Friends' Sports Ranking". (on APP home page)
Take photo: can take photo directly in the APP, also user can use the watch S3 button as the shutter button for taking photo remotely. (on APP home page)

Data upload and refresh

Sport data upload

When the APP is normally connected to the watch, the watch sport data will be automatically uploaded to the cloud server.

Sport data refresh

On APP main interface: Swipe down from top of the screen (see right picture), you can get (refresh) the latest data of the watch, and upload it to the cloud server.

Attention:

Before using Pedometer function, please set /sync the date and time on the watch accurately, otherwise the statistics may be inaccurate due to date & time mismatch between watch and cloud server.

Sport data of the watch is transferred to the phone via APP, which will then be uploaded to the cloud server via mobile phone network (3G/4G or WIFI) or GPRS. So to ensure data upload is successful, please make sure BT connection between phone & watch is normal, and make sure the mobile phone network is normal.

Connection instruction for some specific mobile phone !

Due to default setting and permission reason, some Android phones may not support BT background data refresh and notification. Then the user may need to activate relevant permission manually. Take HUAWEI Honor X4 phone as an example:

1. In the phone Settings, enter the "Notification center", make sure QQ, WeChat, sports+ etc APP status are all turned ON.
2. in the Settings, enter "Protected apps", make sure QQ, WeChat, sports+ etc APP status are all turned ON.
3. in the Settings, enter "Permission manager", make sure 'Trust this Application' option for QQ, WeChat, sports+ etc APP are turned ON.

Mobile phone configuration requirements for the APP:
iPhone: IOS 7.0 or above, BT4.0 or above.
Android phone: Android4.3 or above, BT4.0 or above (the user outside China, please instal Google Play before scanning).
