Watch Diagram

Watch Function

Caution

- 1 Bluetooth 4.0: Well compatible with Android 4.3, iOS 7.0 or later.
- 2 Please connect the charger to activate the watch for the first use.
- 3 Bluetooth connection:
 - a Make sure the Bluetooth function is activated on your phone, and the watch is powered on;
 - b When searching for Bluetooth, make sure the watch is not bound.
 - c When searching for Bluetooth, keep a connection distance as closer as possible between the watch and smartphone.
- 4 If the watch does not receive the push notification, make sure the APP is running in background and notification reminder is turned on (The auxiliary function needs to be enabled as well).
- 5 If the data of sports, sleep and heart rate are not synchronized to the APP, try to disconnect and re-connect the Bluetooth.
- 6 If you plan to bind the watch with another account, please unbind the current account first.
- 7 If the screen fails to stay on, please put the watch on charger and keep charging.

Operation Instructions

1 Charging Instructions(Special Remarks)

- a When charging, keep the watch on the centre of the charging base steady, and the charging sign will showing up on the screen when it start to charge normally.
The watch is not charge if the charging sign can't show up !
 - b The watch screen will closing after 30 second automatically which is normal , and the watch is still charge.
 - c If the watch has not charged for a long time, the charging sign will showing up in 10 minutes when charging again.
- 2 Download and install APP
IOS: Search " Smart Daily " in the App Store and download ;
Android: Scan the QR code and download.
- ③ **When Install by android, attention that :**
Make sure that Backgrounder, App start automatically, App trusting,
- ④ The notify authority are all open ;
In order to ensure the watch can running normally, do not close the background interface please.

3 Bind watch

Open the bluetooth and "Smart Dairy", tap "add watch" in App, start to search, bind and pair, the bluetooth sign will showing up on the watch screen when connection is successful

As bluetooth connection is succeed, the digital time will be synchronized between watch and phone. Tap "find the watch" on App, the watch screen will stay on and display the sign with vibration effect.

Bluetooth auto-reconnect: Bluetooth disconnect when out of the range (about 7m diameter range). But within the range, it will connect automatically.

4 Unbind watch

Open "Smart Dairy" App, tap " Unbind Watch " in Setup menu and the unbind prompt will display, then select " Unbind " (Under a successful Bluetooth connection)

PS: IOS system: you need to tap " Ignore the device " in the bluetooth setup interface on the phone.
