

L9 Smart Watch User Manual

Please refer to user manual before use
V1.0

Thanks for choosing our L9 smart watch. Please read this user manual to fully understand how to use this device concisely. Our company reserves the right to amend the user manual without prior or further notice.

Notice: Make sure that you turn on the Bluetooth on your smart phone at the same time, so Bluetooth device around can be found, iphone user need to open Bluetooth on "settings" page, otherwise, smart watch cannot be found.

When smart watch asks "synchronize date and time?" click "Yes" to synchronize time. Smart watch can also receive synchronized information from smart phone.

3.4 Function menu introduction

- **contacts** : synchronize contacts on the smart phone.
- **Dial** : Bluetooth dial. After successful Bluetooth connect, smart watch can dial phone number directly ;

Dial from call logs: Transfer interface from dial page to call logs page, and choose one call record to call back directly.

Pick up incoming calls : When smart phone gets a call , smart watch also has call reminding via ring, name and phone number will display on the screen.(smart phone have already open incoming call display function) . You can choose to pick up or hang up according to prompts given on the screen. If need digital dial plate via communication , slide left on the screen , then it will come out.

- **Message** : Synchronize message from smart phone (IOS smart phone check on the remote notification) ;
- **Remote notification** : display synchronized information from smart phone, such as QQ, WeChat, message, time, Twitter, Facebook etc.,
- **Bluetooth dialer** : search Bluetooth device around, pair and connect. If many Bluetooth devices are around, then suggest you to search smart phone via Bluetooth dialer, because smart phone has only one name and is easier to identify. Long press connected Bluetooth device to delete pair operation between connected devices.
- **Pedometer** : Pedometer activates by default while power on to record your sports data. Scroll up on pedometer interface access to setup page. You can set up individual information including gender, height, weight etc., and check historic sports record.
- **Music player** : After successful Bluetooth connect, music on smart phone can be played on the smart watch synchronously.
- **Tool**

Calendar : display month, date, week

Alarm : add alarm to set up ring, vibration, cycle period and times.

Anti-lost : find your smart phone via watch (with successful Bluetooth connect)

1. Prepare before use

- 1.1 Check device model and accessories.
- 1.2 Charge the battery for 2 hours above

2. Brief introduction

2.1 Basic structure

Call logs : check your recent calls and call back or edit before call.

Calculator : use addition subtraction multiplication to calculate.

Find a phone : click to find your phone , alarms are raised from smart phone.

Camera (remote camera) : use smart watch to control smart phone camera and take photos.

Notice : Photos are always saved on the smart phone , use smart phone to check photos, some smart phone cannot see photos via picture browser, you can check the corresponding files. Remote camera needs to open camera function and stay on this page on the smart phone first. Then smart watch can take photos synchronously.

• Health management:

Sedentary : set up reminding time to stand up and move. Suggest you to make some movements every hour. Default setting is once in half an hour.
