2. First use

2.1 Battery and load management:

Before the first use, please make sure that the battery of the device is fully charged. Just connect the adapter or USB interface, then you can charge the device.

The first two times of charging please keep the tablet connected for about 6 hours, then it will only need about 4 hours to charge.

[Remark] This tablet uses built-in polymer battery, charging should be done by standard adapter (Input: AC110-240V 50/60Hz Max:180MA. Output: DC5.0-5.5V/1.5A), this device has no DC charging supply, USB interface can charge, choose USB interface to charge.

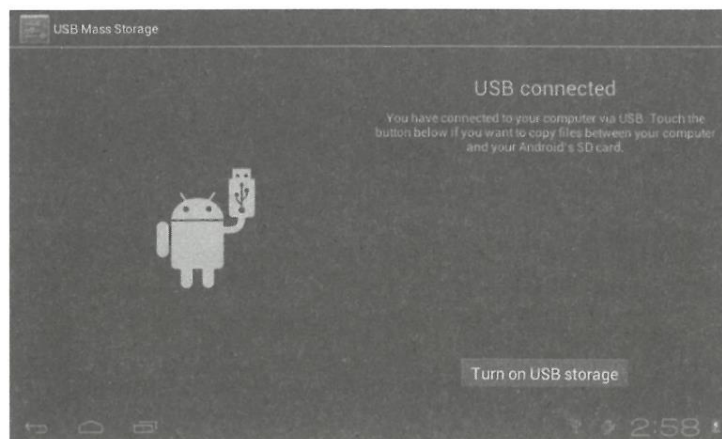

During charging, the battery icon will scroll. When charging is finished, the battery icon will turn green and stop rolling. In order to prolong the service life of the machine, it is suggested to use all the battery power before charging.

[Remark]

1. If you will not use the tablet for a long time, to avoid damage caused by power consumption, charge the battery at least once a month.
2. When the battery is low, connect the power adapter, the device will remind you that the battery is low and charging, so you should wait for a while until the battery has enough power to enter the main menu.
3. Charging the device must be done in standby mode to achieve normal charging time. If you use it while charging, due to the power consumption of the device and the display, the charging time may be longer.

2. 2 Connecting to PC

Use the USB cable to connect the device to PC, the device will display the USB connection window; turn on the USB storage to connect to PC.

5.1 Application Installer

This tablet can support Android apps developed by third party, most of the apps can be installed from network, you can also copy to NANO FLASH or SD card. Click the app installation icon, the Install, Manage and Exit options will appear.

Install: Click install, enter the APK installation interface separately for internal memory disk and SD card disk. Select the APK you want to install, click it to install, back to the main menu, the installed application you just selected will be displayed.

Note: some apps can only install successfully on the memory card, most downloaded apps may not install directly on the device.

Manage: click manage, you will enter the third party application interface. Click install icon, you will enter the stock interface.

6. Troubleshooting

6.1 The device cannot be switched on:

1. Check the battery charge.
2. Connect the adapter first and check it again.
3. If after successful charging the device still cannot be switched on, please contact your supplier or service center.

6.2 After starting the display or the startup image has appeared, the device does not ring.

1. The power is not enough, please charge the tablet or also test the sound with headphones.
2. Please check the volume is more than 0.
3. Check if the music file is damaged. Try to play another kind of music, if the file is damaged it may cause noise or skipping.

6.3 Unable to copy files or play music

1. Check that the connection between the computer and the device is correct.
2. Check that the memory storage space is not full.
3. Check that the USB cable is in good condition.
4. Check if the USB connection is not disconnected or interrupted.
