# Kid´s tablet AT0031

Instructions

Thank you for purchasing our products! This equipment is aimed at safety, behavior limit and healthy and educational content management, focusing on establishing a safe environment for children and blocking the dangers, making parents rest assured about their children's network environment.

Parental Controls

Aimed at separating content that is not suitable for children and protecting their proper physical and psychological growth, parents can filter content that needs to be blocked.
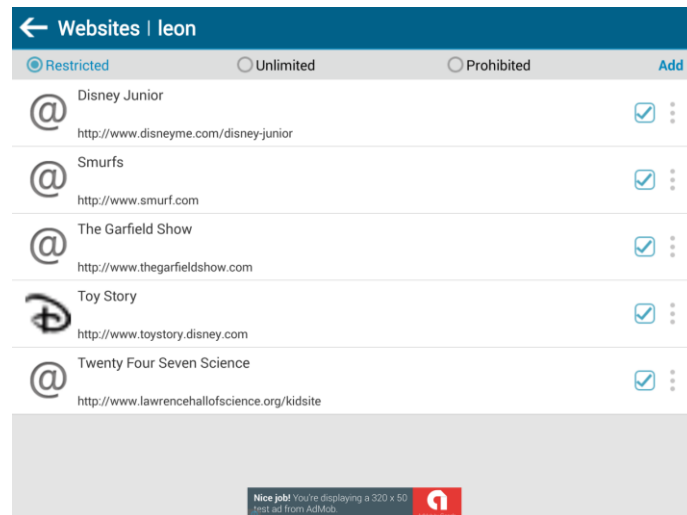

1. Application filter

Select apps that are appropriate for children and block inappropriate content, such as gory and violent content. Only selected apps will appear on the device desktop.

2. Website filtering

When children use the Internet browser, it will automatically block websites without parental permission.
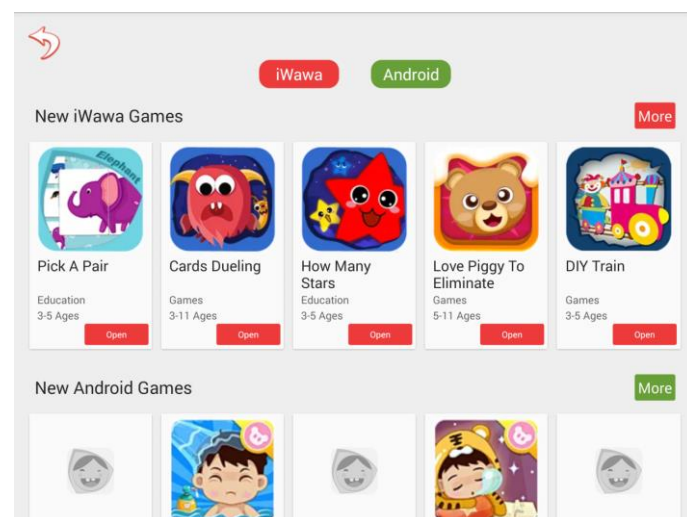

Content and management

Provide children with rich application resources and use tools to manage applications, video, music and other content.
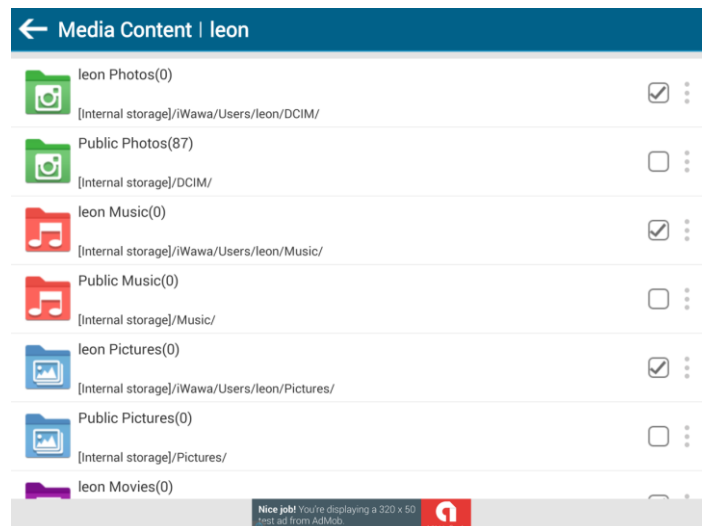

1. App recommendation

The Kids Store recommends educational games and other applications suitable for children. Recommended content is updated regularly and can be downloaded free of charge.

2. Multimedia management

Children can open the "Video" application on the children's desktop and watch all the good movies selected by parents; similarly, children can open the "Gallery" and "Music" applications, view photos and listen to pre-prepared songs.
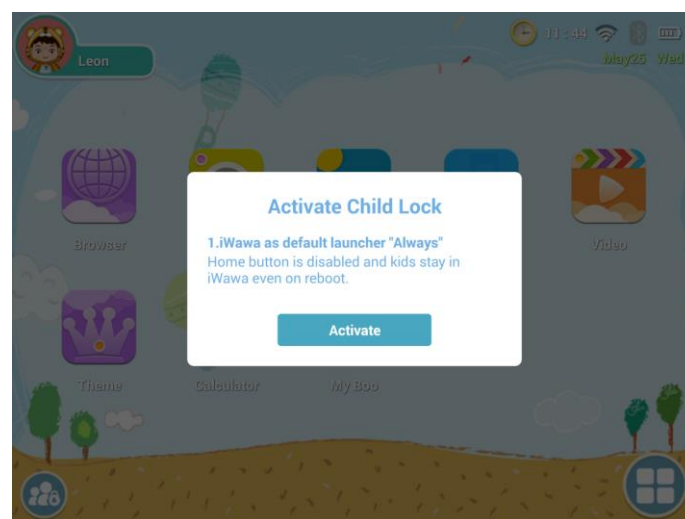

Behavioral restrictions

Restrict children's behavior with iWawa program, children can no longer access parents' desktop, unexpected consumption and game addiction can be effectively prevented.
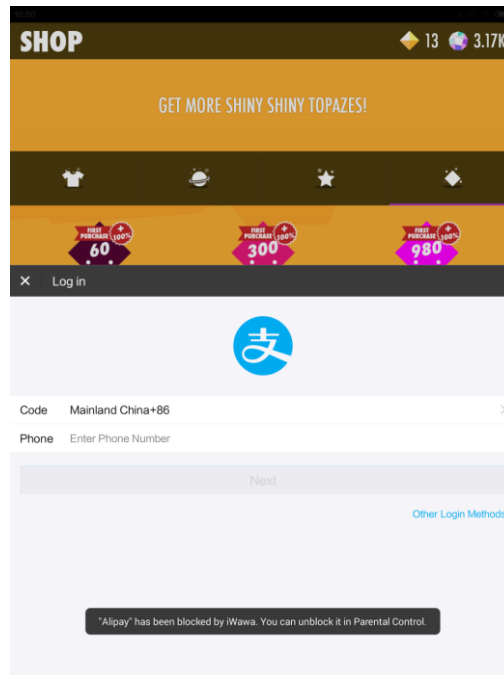

1. Child lock

Without parents' permission, children will not be able to leave the children's desktop. It not only ensures that children remain in a safe environment, but also ensures that children do not have access to the applications on the parents' desktop.

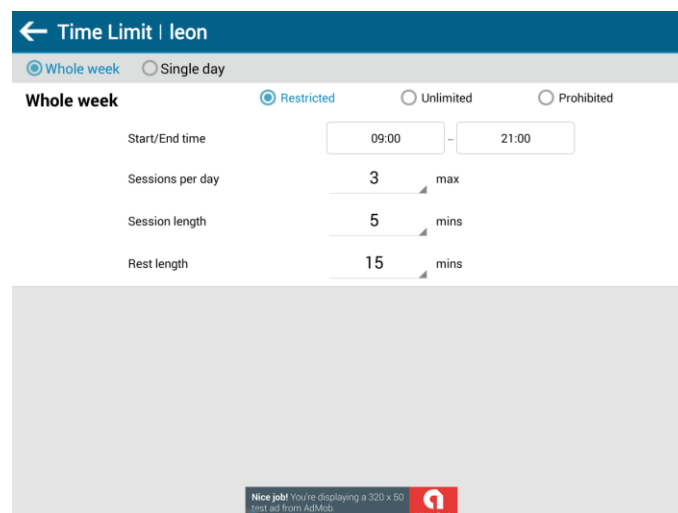

2. Restriction of consumption

All purchases require parental confirmation by entering the password. Avoid unexpected consumption by children by clicking the wrong buttons.

3. Time limit

Parents can set a schedule for children to use the tablet and have a break time. It will automatically transfer to the break time when the time is up and the tablet is temporarily unusable. It is flexible to protect children's growing environment.

4. Behavior report

The system automatically produces detailed application usage reports that record children's behavior in using various applications and frequency. In this way, parents can easily understand children's habits and preferences.
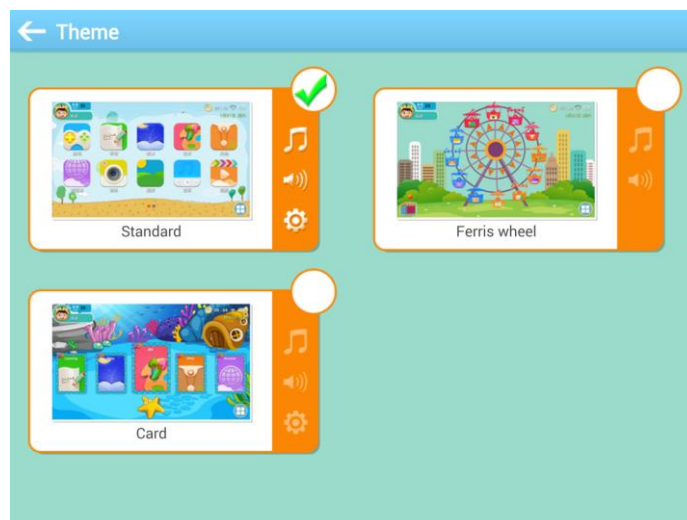

Highlights of the functions

It provides more practical and convenient functions for children and parents.
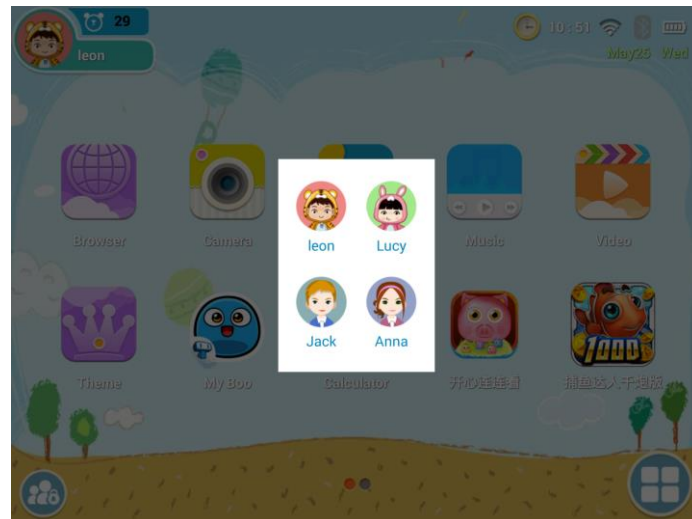

1. Personal style.

Multiple beautiful themes, children can create their own space.

2. Multiple accounts

A tablet can set up more than one account. Each child can have his or her own independent desktop.

3. Extend the time quickly

Parents can enter a password to extend 30 minutes for children, and cope with some unexpected conditions easily.
