8 Troubleshooting

Watch the first boot can not connect to the server, app instructs the display device is not made networking. Please check:

After finish register, input the correcter account number and password, click login, enter the main menu. The main menu show as below:

● Partial function instruction:

● (1) Inter-phone: Watch talk to mobile phone

App sent voice: After turn on record function. App start to record and sent to watch. The longest voice can be 15s. Short press the power button to play the voice

● (2)Map：Real-time check the watch's location

- The map menu display the watch and APP mobile phone position.Watch start to count for 3 minutes by Click "location". The interval time for upload is 3s. After 3 minutes it will back to the default work style. We can know the pattern of the watch location in real-time on the map menu.When location icon is red it is GPS location, Yellow is LBS location,Green is WIFI location.

● (3)Setting: Parameters setting for watch

- ① Set SOS phone number: 3 phone numbers can be set,It will alert after 3S if press SOS key when in emergency situation. Call the 3 phone number periodic. If nobody answer it will be over after two turns.
- ② Monitor: Usually parents' phone number are set as monitor number.When confirmed the watch dial the monitor number initiatively,But the watch can not hear any sound from phone. In that way the phone can monitor watch

---

1) Inside the watch is not SIM gsm network, such as telecommunications does not support.

2) watches in the SIM card is provisioned for data traffic, data traffic must be compatible with 2g of watches currently only 2g of data traffic.

3) server parameters namely IP and port, ID is correct, the bar code should be the same id and write id watch phone editor SMS pw, 123456, ts # sent to
watch factory stickers, customers can use their own cell
watch (wristwatch card must be installed boot, SMS must be in English input method), if agents do not understand can ask.

4) There are two situations can not be registered: a number indicating that the device does not exist or device number already registered, you must find agents processing; b prompted an account that is already registered the account is registered for a customer account can only register again.
